Ms. Marlene H. Dortch, Secretary  
Federal Communications Commission  
445 12th Street SW  
Washington, DC 20554

Dear Secretary Dortch:

I am writing to express support for LightSquared's plans to bring a much-needed 4G wireless network to Missouri and Kansas (IB Docket No. 11-109).

My company, located in Overland Park, Kansas, represents a large portfolio of commercial property which includes Carefree Industrial Park located in Independence, Missouri. This project is a premier subsurface business park where over 44 tenants have operations providing services ranging from manufacturing, distribution and light assembly.

It is important for any business to have a reliable backup system in place. Our wireless communications should be no different, especially in the wake of a disaster.

LightSquared's wholesale 4G network is relatively unique because it utilizes regular cellular towers and the world's largest commercial communications satellite, providing seamless uninterrupted service coast-to-coast even in the case of natural disasters.

I understand the grave importance of ensuring there are no interference issues between LightSquared's novel new technology and other technologies like GPS. I am sure that LightSquared will work diligently to address any concerns that may be raised. I am confident the FCC can facilitate a process to allow this new network to deploy and preserve GPS reliability. Consumers deserve the opportunity to utilize both technologies and I sincerely hope the FCC will work toward a meaningful solution.

Thank you for your oversight and role in this important issue.

Sincerely,

LS COMMERCIAL REAL ESTATE, INC.

Paul M. Licausi  
President
